Navicula Pendant

By David Trubridge

Description

The Navicula Pendant is derived from nature, in this case from one of the many microscopic diatoms that float around in the oceans. Thin curved pieces of Bamboo Plywood create a flowing structure that casts magical patterns. It is lit from within with a row of LED pin-point lights. Includes a 120-277V input-24V output constant current driver. Dimmable to 5 percent with Incandescent (120V), or ELV, MLV, or 0-10V dimming. Made in New Zealand. Note:Ships fully assembled with white cord and canopy.

Shown in white / bamboo exterior / bamboo interior

Specifications
