

TruTrack Magnetic 2-Circuit Recessed Track 24V

SPEC #

EDG1129201

DESIGNER Gregory Kay
BRAND PureEdge Lighting

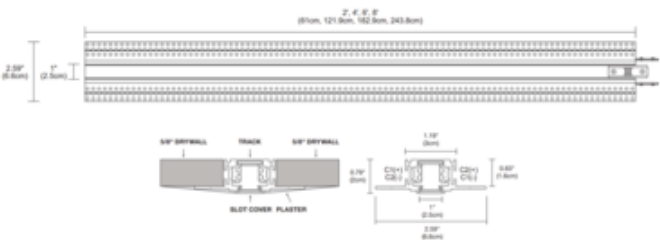

DESCRIPTION

The innovative TruTrack Magnetic track system is a plaster-in recessed 24VDC 2-circuit track system allowing for two groups of fixtures to switch and dim independently. The TruTrack patented design allows for track heads to be attached to the system with magnetic track head connectors. The TruTrack system is designed and engineered to blend seamlessly within drywall surfaces, and provides more flexibility to make turns along the ceiling. A paintable slot cover included with TruTrack offers a clean architectural aesthetic, leaving only the track heads visible once installed. TruTrack Magnetic is available in four lengths with the ability to cut in the field. Included components: Opaque White Slot Cover, End Power Feed Connector (T24M-2C-P), Power Jumper (T24M-JC-2C) and Straight Connector (T24M-2C-SC). Designed for use with 24VDC Universal remote power supplies (ELV/TRIAC/0-10V dimming) up to 40 feet away. 2-circuit system, with two power supplies, allow for independent switching and dimming. Power feeds offered in End, Center, L, T and X shapes. Note: Power supply, power feed, end cap(s), and track heads sold separately.
