String Light Cone Pendant Head

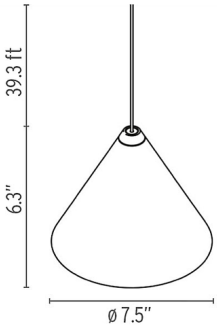

By FLOS

Description

Unleash a unique interplay of lines and light with the Flos String Light Cone Pendant, a truly innovative fixture that transforms illumination into an art form. This distinctive light is composed of a sleek, simple cone suspended elegantly on an exceptionally long Kevlar reinforced coaxial cable. This cable is designed to be secured by a separately sold canopy or base, and its extended length, combined with additional anchor points on the wall or ceiling (five hooks are included), opens up endless possibilities for creating visually impactful and personalized geometric configurations. You can use a single light head for a minimalist statement or combine multiple units to craft your unique lighting arrangement.The cone itself is crafted from durable die-cast aluminum and features a polycarbonate diffuser, ensuring it provides a beautiful ambient illumination for your space. The light comes with a choice of 39 or 72 feet of cable, with optional cables available separately to extend the length further. The String Light Cone offers two advanced dimming options: control via the Casambi App (dim or turn on/off using the Flos Control app on your smart device, or by pressing the cable near the light head) or Soft Touch dimming (dim or turn on/off by pressing the cable on top of the light head). Please note that a base or canopy is required and sold separately, and the light can only be dimmed at the light head or through the Casambi app, not using a separate wall dimmer.
