Camouflage Outdoor Wall / Ceiling Light By FLOS

Description

Experience the captivating artistry of the Flos Camouflage Outdoor Wall / Ceiling Light, a design engineered to blend seamlessly into nature while delivering a striking luminous effect. With its ultra-slim profile and refined natural tones, this fixture becomes virtually invisible against its background. However, when illuminated, it evokes the magical phenomenon of a solar eclipse, as a soft halo of light shines from behind its solid disc, creating a mesmerizing glow. The Camouflage is designed for durability and versatility in outdoor environments. Its stone finishes are crafted from robust fiberglass-reinforced cement mixtures, offering an organic texture, while the painted finishes are exterior-rated epoxy polyester powder coats, ensuring superior strength and resistance to heat and UV. The Primer finish option allows for on-site painting with any water-based exterior paint or stucco, providing complete customization. Available in two convenient sizes a 5.5-inch diameter (Camouflage 140) and a 9.5-inch diameter (Camouflage 240) this light is a perfect solution for illuminating walkways, courtyards, and diverse outdoor spaces. Please note that a remote power supply is included and must be installed in a separate location.

Specifications
