Tube Alarm Clock

By LEFF Amsterdam

Description

The Tube Alarm Clock was designed with it's dial as an extrusion ring. Extrusion molding is a design technique that involves forcing materials through a mold, the extrusion profile is what gives the material its shape. Piet Hein devised a ring like that for the design of the clock face. It is the idea of keeping things normal and down-to-earth, but still extraordinary. The alarm and snooze function are situated in the back of the Tube to not disrupt the design. Includes LR44 battery.
