Sunnata LED+ Touch Dimmer

By Lutron

Description

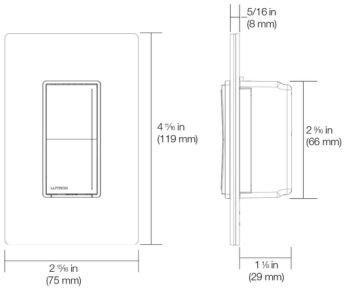

Easily adjust your lighting with a simple touch or swipe using the Sunnata LED+ Touch Dimmer. Superior dimming for dimmable LED/CFL bulbs up to 150W or incandescent/halogen bulbs up to 600W. Touch or swipe the light bar to dim or brighten your lights. Use the rocker switch to turn lights on and off. Lights gradually fade on and off for comfortable eye adjustment. Light bar glows for finding it in the dark. MyLevel Personalization features allow you to program a preset light level, adjust light bar brightness or turn it off, and set low-end and high-end trim to maximize bulb performance. Can be used in single-pole or 3-way mechanical switch applications, or with up to 9 matching accessory switches (Lutron ST-AS, sold separately) for a total of up to 10 control locations. No neutral wire required. Note: Wall plate sold separately.

Shown in gloss white

LED+ and Accessory Switch Dimensions

Wired Product

Note: Requires a U.S. wallbox 2 ¼ in (57 mm) deep minimum.

Note: The accessory switch ST-AS does not have the light bar pictured.
