Sunnata PRO LED+ Touch Dimmer

By Lutron

Description

Adjust your lighting with a simple touch or swipe using the Sunnata PRO LED+ Touch Dimmer. Advanced PRO LED+ technology provides maximum flexibility, enabling phase selectable dimming of a broad range of load types. Superior dimming for dimmable LED/CFL bulbs up to 250W, incandescent/halogen/ELV up to 600W, and MLV up to 400 VA. Touch or swipe the light bar to dim or brighten your lights. Use the rocker switch to turn lights on and off. Lights gradually fade on and off for comfortable eye adjustment. Light bar glows for finding it in the dark. MyLevel Personalization features allow you to program a preset light level, adjust light bar brightness or turn it off, set low-end and high-end trim to maximize bulb performance, and set forward or reverse phase. RTISS technology reduces light flickering by compensating in real time for incoming line voltage variations. Can be used single-pole or in a multi-location application with up to 4 matching companion dimmers (Lutron ST-RD, sold separately) for a total of up to 5 control locations. Not compatible with mechanical switches. Screw terminals make wiring easy. Neutral wire required. Note: Wall plate sold separately.

Specifications

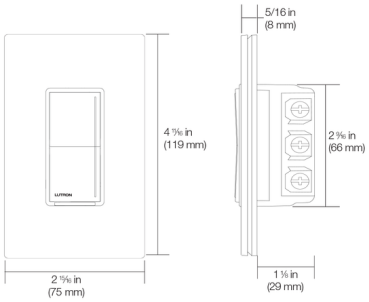

COLOR	N/A
BODY FINISH	Gloss White
WATTAGE	250W
DIMMER	N/A
DIMENSIONS	2.938"W x 4.688"H x 1.438"D
