Tatu Floor Lamp

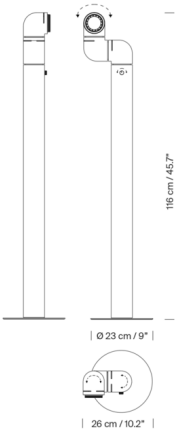

By Santa & Cole

Description

Andre Ricard was inspired to create the original Tatu Lamp on a transoceanic flight by the directional reading lights of passenger airplanes. Now Santa & Cole has updated this classic mid-century design as a floor lamp for the modern age with an LED light source and integrated optical adjustment on column. On/off switch on cord. The Tatu Floor lamp retains the original design's retro charm, with a cylindrical base topped by a series of bends that allow the light source to be rotated and angled. A moveable converging lens allows the focal length to be adjusted, ensuring the right amount of light is directed precisely where it is needed.
