Kable Lite 4 Inch Single Feed Round Canopy

By Visual Comfort Architectural

Description

A single feed canopy is mounted to a wall or ceiling adjacent to the kable lite run. It can be used anywhere in the run. It brings power to the kable lite run from a remote single feed transformer (sold separately). The low-voltage leads from the remote transformer are connected to the canopy leads inside the electrical box and the canopy mounts to the electrical box. The two leads from the canopy are 24 inches long and can be cut and bent in the field. To drop the kable lite system further down from the ceiling, add one pair of hardwire feeds (sold separately). 4 inch round canopy mounts to a standard 4 inch electrical box with round plaster ring (provided by electrician). Finish available in Satin Nickel. ETL listed.

Shown in satin nickel
