Big Ass Fans

DESCRIPTION

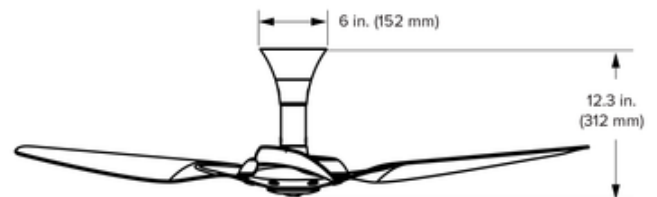

The Haiku Gen 4 Low Profile Ceiling Fan is an expertly crafted blend of form and function, stylish in design with premium finishes and a fleet of smart, advanced features perfect for making the most of your indoor setting. Whisper-quiet, energy-efficient airflow is delivered by a permanent-magnet brushless DC/EC motor and precision-balanced airfoils (blades). The airfoils are made of aircraft-grade aluminum or eco-friendly Moso bamboo. Built-in SenseME technology automates efficiency using on-board sensors. The fan can turn on or off based on room occupancy detected by a motion sensor, and temperature and humidity sensors detect environmental changes to automatically fine-tune fan operation and maintain your comfort level. The included bluetooth remote control enables fan speed adjustment (7 speeds), motor on/off, and motion and environment sensing on/off. It can be hand-held, placed in a magnetic wall holder, or fixed in a wall mount. The mount and holder are included. An optional IR control is sold separately. The free Haiku by BAF app offers additional control functions including scheduling, grouping fans, and enabling Whoosh (breeze) or Sleep modes. Haiku also integrates with smart home systems to enable voice control including Amazon Alexa, Google Assistant, and ecobee. With its world-class airflow and modern features, the Haiku smart fan is an excellent solution for refreshing your space.
