Freedom Task Chair with Headrest By Humanscale

Description

The Freedom Task Chair with Headrest, created by Niels Diffrient, automatically adjusts to every user. Designed to eliminate the need for manual controls, it features a sophisticated weight-sensitive, self-locking recline mechanism, cushioned armrests and an articulating headrest to support the head and neck. Its refined and sculpted cushions were designed to mimic the body's natural contours and decrease pressure point loads for premium comfort. And its unique form has a timeless aesthetic that complements any workspace.

Shown in graphite / black corde stretch fabric
