Kernel Linear Pendant

By Bert Frank

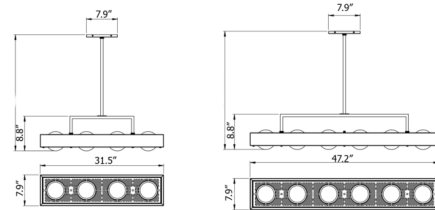

Description

The Kernel Linear Pendant is defined by its clean, linear design and repetition of simple, geometric shapes. A row of opal glass globes provide a contrasting shape to the pendant's rectangular frame and direct light both up and downwards. The bottom of the pendant is covered by a laser cut brass diffuser, with curved slots echoing the globes' curves. Note: Includes mounting plate to cover standard 4 inch US junction box. Overall height to be specified at time of order. Note: UL certification is available upon request for an additional charge. Please contact our sales team for assistance.
