Turbo Pendant By Gubi

Description

Originally designed in the mid-1960s by Louis Weisdorf, the Turbo Pendant was conceived as a modern update to traditional Japanese paper lanterns. Simple in shape but complex in structure, the pendant is constructed of swirling lacquered aluminum bands that shield the light source in order to reduce glare and provide diffused, ambient illumination. Turbo's timeless design will complement both retro and modern interiors alike.

Shown in white / alabaster white

Specifications
