

BRAND Les Jardins Solar Lighting

DESCRIPTION

Whether using one to light a small side table or arranging multiple across a larger dining area, the Tekura Outdoor Solar Portable Table Lamp creates a tranquil, inviting atmosphere for your outdoor space. This stylish piece combines teakwood with high-performance Italian HPL in a slate grey finish. This cordless LED lamp is rechargeable through the solar panel or micro-USB port. It has a simple on/off mode and a smart mode that automatically adjusts brightness based on ambient light and power reserves. A push button on the LED module is used to turn the light on or off, set dimming level, and select operation modes. A solar charge takes 8 hours in optimal conditions. A fully charged lamp lasts for 4-150 hours depending on the dimming level used.
