

BRAND Les Jardins Solar Lighting

DESCRIPTION

The Pendulum Outdoor Solar Floor Lamp is an eye-catching presence in any outdoor space, with its precisely engineered cantilever design and sophisticated mix of materials. A weathered teakwood finish is combined with space gray powder-coated aluminum and rope, complemented by a minimalistic lava stone base. This cordless lamp creates a beautiful setting in outdoor dining spaces or poolside decks. The LED module is rechargeable using the solar panel or micro-USB. The light also has a motion sensor, a dusk to dawn setting, and a smart mode that automatically adjusts brightness based on ambient light and power reserves. A push button on the module is used to turn the light on or off, set dimming level, turn the motion sensor on or off, and select operation modes. A solar charge takes 8 hours in optimal conditions and a USB charge takes 7 hours. A fully charged lamp stays on for 5-200 hours depending on the dimming level used.
