## Cono Plug-In Wall Sconce By Catellani & Smith

 $\epsilon$ 

## Description

The Cono Plug-In Wall Sconce sports a slim, tapered silhouette that provides both up and down lighting from the top and bottom of the fixture. Cono is finished in a rich, hand-painted blue with a roughly textured, metallic leaf interior for a luxurious look. A built-in dimmer allows the LED uplight to be controlled via a button on the back of the fixture. A separate on/off button also located on the back of the fixture controls the downlight.

Shown in blue / gold leaf
