# Corvette Round Chandelier

By Dainolite

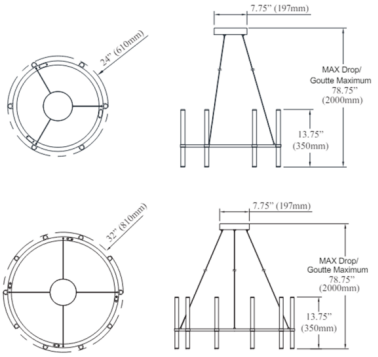

DAMP

## Description

The Corvette Round Chandelier makes efficient use of both energy and materials, using tall, slender tubes of acrylic to diffuse the light of the integrated LEDs inside. To maximize the breadth of the ambient light, the cylinders are arranged vertically around the exterior of a sleek metal ring. In a dining room or tall entryway, this chandelier adds a sense of refinement as well as vibrant all-around light.

Shown in matte black / white
