Leaf Shelf

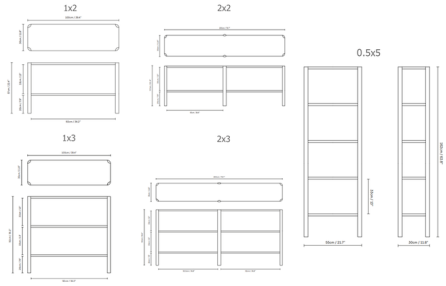

By Form & Refine

Description

The Leaf Shelf is an effort to create a shelving system striking an ultimate balance between aesthetics, stability and packability. It is characterized by a very pure aesthetic, the aim being that the leg pillars are the center of attention. With an organic and clean expression being sculpted in the shape of a leaf they give the system its signature look. The construction itself is also breaking ground in terms of stability, as it is entirely contained without any visible screws or extra stabilizing parts underneath the shelf.
