Articulating MR16 Inground Light with Rock Guard 12V

By Kichler

Description

The Articulating MR16 Inground Light with Rock Guard features a sealed glass enclosure to protect against water and debris. This solid, thick-walled cast brass well light with weather-resistant plastic composite sleeves is ideal for harsh environments including coastal climates. The lamp clips are gasketed and threaded for easy installation, and the light angle can be adjusted to aim as needed. A rock guard and cowel top allow the fixture to be exposed and the light to be adjusted above the fixture. The Centennial Brass finish offers a vintage feel, brown with gold undertones that will patina over time. Note: A transformer is required and is sold separately. This fixture is to be used only with a low voltage magnetic power unit (transformer) rated a maximum of 300 W (25 AMPS) 15 volts.

Shown in centennial brass
