

**BRAND**

Philips Hue

**DESCRIPTION**

Trigger any Philips Hue smart bulb or fixture to turn on automatically using the Hue Indoor Motion Sensor. The sensor also includes a light-sensing photocell, allowing users to change the brightness of connected lights based on ambient light levels and time of day. With a wireless design and small size, the sensor can be installed wherever it is needed most. The Hue Indoor Motion Sensor requires a Philips Hue Bridge (sold separately) and the Philips Hue App to connect to compatible Philips Hue lights.
