Sanitizing Desk Lamp with Smart Switch - Overstock

By Adesso

Description

Simplee Adesso gives you peace of mind and a host of lighting options with its UV-C Sanitizing Desk Lamp that combines proven sanitizing power, convenient device charging, and touch-activated LED lighting. The sleek lamp features a laboratory-tested UV-C compartment built into the base to safely sanitize phones, keys, remotes, watches, and other daily-use items at the press of a button. This reflective inner chamber ensures 360 degree sanitizing during the lamp's 10-minute sanitizing cycle. For your lighting needs, the lamp's large rectangular shade features a frosted diffuser to throw even lighting from the integrated, eco-friendly 10W LED light. The shade is also adjustable, allowing you to direct the light wherever it's needed for either task lighting or ambiant lighting. With a convenient touch smart switch located on the base, three brightness settings and three color temperature settings (2700K, 4000K, 5000K) are controlled by the touch of a finger, ensuring you have the desired LED lighting with every use. The lamp also provides convenient charging power for your phone, tablet, and other devices. The base houses an integrated Qi-certified charging pad, supporting 5W charging on contact to get your phone from 0% to 100% in just 3-4 hours. In addition, a USB port is located on the back of the base for charging a second device simultaneously. NOTE: This is a discontinued model and limited to quantity on hand.
