Helice Marble Ring Sculpture

By Currey and Company

Description

The propeller shape of the Helice Marble Ring Sculpture will be a dynamic presence in a space; the white sculpture a feat only an accomplished stone carver could create. The flowing lines as they reach the bottom of the piece envelope the black metal stem to which it is attached. The stem and the base are pared down, adding a nice contrast tonally and structurally. Note: Because the Helice is carved from natural marble, each sculpture will vary slightly.

Shown in black / natural

Specifications
