Cyborg Club Armchair

By Magis

Description

The design of the Cyborg Club Armchair is based on an industrial part consisting of the four very simple plastic legs, almost basic, deliberately non-designed and on an artisanal designed part, the backrest, which is made of wicker. It is precisely the backrest that dictates the chair's expressive and aesthetic quality. The seat is a highly resistant and versatile polycarbonate shell. This further evolution of the chair is in equal parts poetic and technological, cozy and surprising, in keeping with the widest range of different settings.
