Spun Rotating Low Chair

By Magis

Description

Thomas Heatherwick has produced a startling twist on conventional furniture design: a functional chair formed from a single profile rotated through 360 degrees. The Spun Rotating Low Chair displays Heatherwick's flair for challenging rules and teasingly plays with the notion of a static piece of sculpture becoming a playful piece of design. When upright Spun is a sculptural vessel and it is only when it is laid on its side that the playful possibilities of its form come to light. Spun allows the sitter to swivel in a circular rocking motion, including being able to rotate in a complete circle.
