Gropius Baby Chair

By Noom Home

Description

The Gropius Baby Chair is named after Walter Gropius, the German architect and co-founder of the influential Bauhaus school and pays homage to his pioneering work in modern design. The Bauhaus movement is known for objects and buildings composed of simple geometric forms and a focus on the intersection of functionalism and artistic expression. These design principles are still relevant today and are reflected in the Gropius Baby Chair's combination of circular and cylindrical forms. Along with its petite proportions, Gropius' playful and casual expression makes it a stylish addition to a nursery or children's bedroom.
