DESCRIPTION

Inspired by the modernist architecture and the unobstructed repetitive building techniques known from the mid century, the Chicago cabinet collection stands as a tribute to this particular architectural period. With its light and floating appearance the Chicago Glass Doors Sideboard almost appears as a piece of modern architecture itself. The elevated solid steel construction gives stability and structure while the floating wooden cabinet adds the spatial impression. The table top functioning as a floating roof with its extended eaves completes the minimalistic framework combining three simple natural materials; wood, steel and stone. Inside of the glass doors sits an LED strip. The internal lighting can switch on / off when one door is opened / closed, or when it is movement activated with the foot from the underneath of the sideboard metal frame.

Shown in: Black / Marquina/ Walnut/ Clear
