TABL Side Table

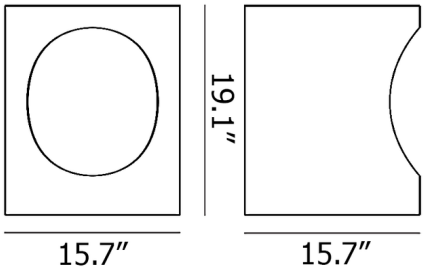

By Woud Design

Description

The TABL Side Table was designed around the idea of adding extra functionality to a piece without the use of additional materials. To implement this concept, designer Roel Vandebeek cut out a circular portion from the side of the metal cylinder and moved it to the top to serve as a functional tabletop. The hollow interior of the cylinder can serve as a storage space for books, blankets, or any number of objects. With its minimalist aesthetic, TABL is a perfect complement to a modern interior.
