Skynest Pendant

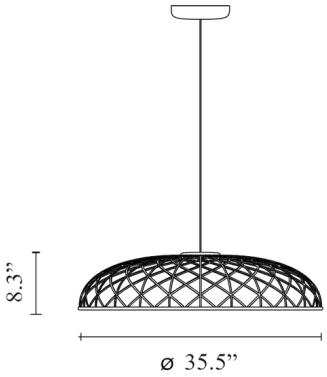

By FLOS

Description

Discover the ethereal beauty and innovative design of the Flos Skynest Pendant, a fixture that forms an airy, inviting dome crafted from an intricate network of woven tubes and luminous elements. Each light is ingeniously powered by micro-connectors located at the top of the structure, with every luminous segment gracefully covered in a delicate woven mesh. The inner side of this mesh is thoughtfully rendered in white, ensuring optimal light emission and a beautifully diffused glow.For structural integrity, the dome's rim is fitted with a refined aluminum ring, while a sophisticated balance system at the top ensures unwavering stability. The canopy, crafted from plastic, is seamlessly painted in the same finish as the rest of the pendant, maintaining a cohesive aesthetic. Beyond its captivating form, the Skynest Pendant demonstrates a strong commitment to environmental responsibility: its mesh is made from recycled and recyclable fabric, and the entire fixture is assembled without any glue, allowing for full separation and recycling in the future. The Skynest is a remarkable choice for those seeking a beautiful, sustainable, and truly innovative lighting solution that elevates any contemporary interior.
