## Skynest Pendant By FLOS

### Description

Woven tubes and luminous elements form an airy dome on the Skynest Pendant. Each light is powered by micro-connectors at the top and covered with woven mesh, with a white inner side for optimal light emission. The dome rim is fitted with an aluminum ring for structural integrity while a balance system at the top ensures stability. The canopy is plastic, painted in the same finish as the rest of the pendant. This pendant is environmentally friendly, its mesh made of recycled and recyclable fabric. It is also assembled without any glue, allowing it to be fully separated for recycling in the future. The Skynest is a great option for those seeking a beautiful, sustainable and innovative lighting solution.
