Hover Table Lamp

By LODES

Description

The Hover Table Lamp features a detached lamp shade supported by a slim cable that creates the illusion of the lampshade floating in midair. The lightness of the design is also reflected in the lamp's construction, which includes a flat-packed paper and polymer shade that can be easily assembled. An included dimmer allows the brightness of the LED light source to be set to the perfect level. Dimmer switch located on top of the stem.
