Phase 01 Chandelier

By Anony

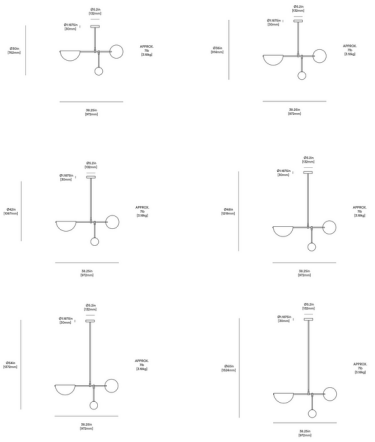

DAMP

Description

Inspired by the balancing act found in hanging kinetic mobiles, the Phase 01 Chandelier is an interpretation of a circle in three forms: a sphere, disc, and a semi-circle. Every component is hand finished and weighted precisely before being attached to the arm, and each tier acts as a weighted foundation for the tier above. Phase conceals its wires inside the arms while maintaining perfect parallel line structures. Phase achieves a fixed equilibrium with weight and steel piping. Includes ELV-dimmable driver.
