Attic Lateral Cone Pendant By LedsC4

Description

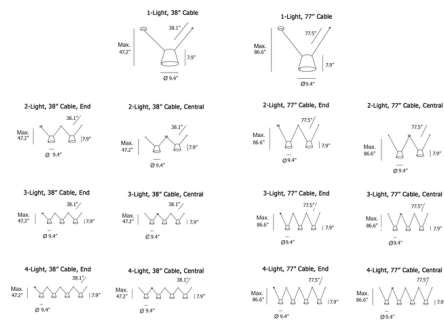

Create a custom lighting design with the Attic Lateral Cone Pendant, a system of conical aluminum shades hung on cables. Hanging height and spacing of the lights can be tailored to your needs by choosing a suitable cable length among the two options, and experimenting with anchor point positions on the ceiling. Two canopy options are available: the end option is positioned at the endpoint of your cable arrangement, and the central option is at one of the intermediate points. Available with 38 or 77 inches of cable from the pendant to ceiling. The Attic offers a creative, modern aesthetic and plenty of illumination for kitchens, dining areas and workspaces.

Specifications
