Calipso Linear Ceiling Light

By Artemide

Description

Introduce a touch of organic geometry to your overhead lighting with the Calipso Linear Ceiling Light by Artemide, designed by Neil Poulton. This fixture beautifully transforms the traditional linear ceiling light into a captivating design statement, adding visual interest and a unique design element to your ceiling. Its signature feature is an elongated honeycomb pattern, ingeniously created by an image-based algorithm that drew inspiration from a photograph of the moon. The resulting structure, a harmonious cluster of tubes of varying diameters, celebrates the intricate geometry found in nature's irregular beauty. This thoughtful and visually engaging fixture delivers even, soft ambient lighting without harsh glare, providing comfort and uniform illumination. The Calipso Linear Ceiling Light is a superb choice for a diverse range of applications, from enhancing residential hallways and kitchens to illuminating commercial spaces like offices, lobbies, or retail environments where sophisticated and comfortable light is desired, ultimately enhancing any contemporary space with its unique form and function.
