Calipso Linear Pendant

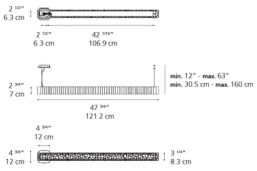

By Artemide

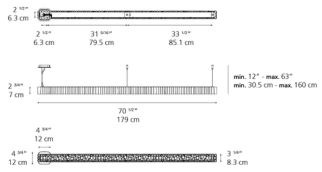

Description

The Calipso Linear Pendant from Artemide, designed by Neil Poulton, redefines linear lighting with its captivating and comfortable illumination. This isn't just a traditional linear fixture; it's a piece of art that seamlessly blends aesthetic appeal with functional design, adding a unique and distinctive visual texture to your space.Its most striking feature is the intricate honeycomb pattern, born from an innovative image-based algorithm that took a photograph of the moon as its muse. The result is a unique composition of clustered tubes of varying diameters, echoing the beautiful imperfections found in nature's geometry. This thoughtful design ensures evenly dispersed, soft ambient lighting without harsh glare, providing comfortable and glare-free light perfect for task and ambient applications. The Calipso Linear Pendant is an ideal choice for a wide array of settings, from refined residential spaces like dining rooms and kitchens to sophisticated commercial applications such as offices, conference rooms, or retail environments, enhancing any Contemporary interior with its unique form and sophisticated presence.
