Levante Pendant

By Luceplan

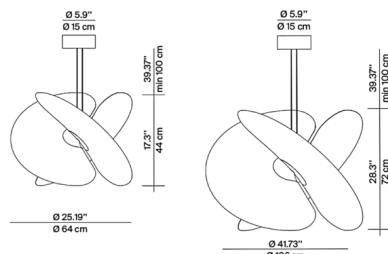

Description

The Levante Pendant offers great emotional impact, based on the creative intuition of the designer, together with the use of recycled materials, technology and design. Levante is impressive, like an organism floating in space. The name Levante suggests lightness and wind, but also a clear reference to oriental aesthetics that stems from the intersection of three large fans with an appearance similar to rice paper. The thickness of the veils is minimal, and they are attached with magnets to the central core that contains the light source. 25.19 Inch: TRIAC/ELV/0-10V dimming. 41.73 Inch: TRIAC/ELV dimming.

Shown in matte white / white

Specifications
