Philo Semi Flush Ceiling Light

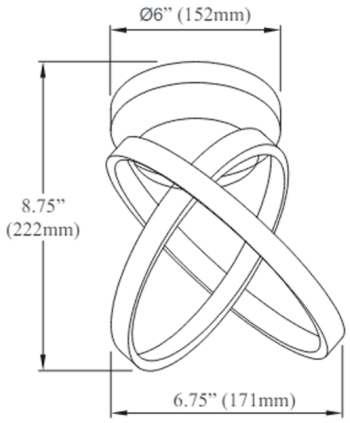

By Dainolite

Description

The Philo Semi Flush Ceiling Light features dynamic focal point in spaces with lower ceilings. This it does with a minimum of elements: 2 overlapping metal rings mounted in tilted positions from the ceiling canopy. Each metal ring houses an array of integrated LEDs, the light from which is diffused outward in all directions through silicone lenses. This elegant yet playful piece is ideal for brightening bedrooms, bathrooms or foyers.

Shown in matte black / white
