Core Low Voltage Smart Transformer

By DALS Lighting

Description

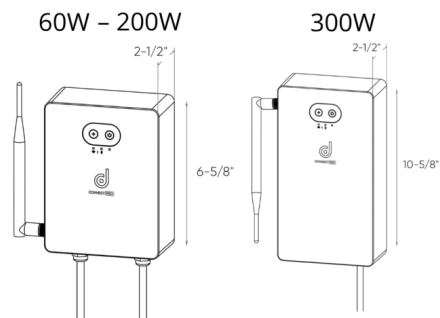

The Core Smart Transformer is the heart of your connected landscape system, unleashing the full potential of smart lighting. It has an integrated hub and supports Wi-Fi and BLE Mesh protocols, and can operate locally (without internet). Its smart technology allows you to control DALS Connect Pro fixtures using the Dals Connect app and voice-controlled assistants. The app enables basic functions including dimming, as well as group creation, scheduling, remote access, and connection with Google Assistant and Amazon Alexa. This transformer supports up to 128 smart devices. It is a constant voltage mode power supply with short circuit and over-voltage protection. Must be installed within a range of a 2.4 GHz Wi-Fi network to control the lights remotely. For use only with DALS Connect Pro fixtures.
