Orbit RGB+CCT Smart Spot Light Pro By DALS Lighting

Description

The Orbit Smart Spot Light is a swiveling, low profile light ideal for a range of exterior applications, such as brightening walkways or flower beds. It can cast a 40 degree beam angle, or the included frosted lens can be attached to create a diffused 120 degree beam. Up to three lights can be stacked to create a multi-head device, perfect for creating multiple pools of light with one fixture. The light can be tuned to 2200K - 4000K pure white temperatures, and also delivers excellent color rendering in a full RGB color spectrum. This is a DALS Connect Pro (DCP) light, incorporating Bluetooth mesh technology. It can be controlled using the DALS Connect app, which offers basic functions such as dimming, as well as group creation and scheduling. The app also enables remote access and connection with Google Assistant and Amazon Alexa if a Core smart transformer is used. A 6 inch metal ground stake, 6 inch T-connector, 6 ft extension cable, and 120 degree frosted lens are included. Note: A transformer is required, sold separately.

Specifications

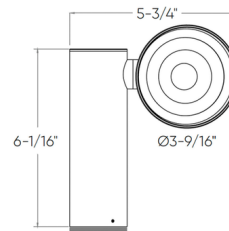

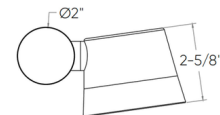

COLOR	N/A
BODY FINISH	Black
WATTAGE	10W
