Orion RGB+CCT Smart String Light Pro
By DALS Lighting

Description

Garden parties, birthdays or a relaxing dinner -- these aren't complete without a string of lights hanging above to set the mood. The Orion Smart String Light is a 48 ft string of 15 LED bulb lights that offer both white and colored lighting options, letting you create the perfect atmosphere. It delivers excellent color rendering, offering pure whites tunable to 2200K - 4000K and a full RGB color spectrum. A loop above each bulb facilitates hanging. This is a DALS Connect Pro (DCP) light, incorporating Bluetooth mesh technology. It can be controlled using the DALS Connect app, which offers basic functions such as dimming, as well as group creation and scheduling. The app also enables remote access and connection with Google Assistant and Amazon Alexa if a Core smart transformer (sold separately) is used. A 24W plug-in transformer is included. Up to two strings of lights can be connected to one transformer.
