Klampenborg Table Lamp

By Audo Copenhagen

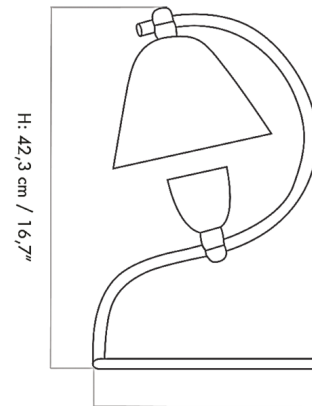

Description

Based off of a sketch by Mogens Lassen from the archives of the Danish National Art Library, the Klampenborg Table Lamp was never put into production until now. Klampenborg's defining feature is its curving stem, which supports a conical shade and bulb socket. Light shines upward into the cone and reflects back out to produce a soft glow. A built-in three level dimmer allows the perfect level of lighting to be set.
