## Root Stool

By Ferm Living

### Description

The Root Stool will introduce a raw, unpolished accent to an interior space. The stool is crafted from teak roots which have been roughly formed into the shape of a stool and treated with a black finish. Root has been designed with a focus on sustainability, as teak roots are often discarded as a waste product once the rest of the tree has been used. Because of the unique character of the materials, each stool varies in its exact shape and dimensions for a truly one-of-a-kind look.

Shown in black
