Kitchen Faucet With Pull-Out Dual Spray By Buster + Punch

Description

A kitchen faucet with pull-out and dual spray function, mixing warm and cold aerated water. Built from rough-cast and precision-machined solid metal in Italy, it features signature linear or cross knurled lever and matching pull-out nozzle that can be toggled between aerated or a needle spray. The tap is refined by hand and finished with a subtle acid-etched Buster + Punch (B+P) insignia.

Shown in steel
