Spero Wall Sconce By Cerno

Description

The Spero Wall Sconce carries a distinctive mixed-material aesthetic in its compact form. A wide leather strap is joined to the metal shade by pronounced rivet details, and it hangs from a slim metal post extending out from the backplate. The bottom aperture allows light to shine downward, providing ample illumination while minimizing glare. Use the Spero in an entryway or place multiple in a living room to bring a touch of both contemporary and rustic styles to the space. The option that includes a bulb is TRIAC and ELV dimmable.

Specifications
