Alfi Work Swivel Chair By Emeco

Description

The Alfi Work Swivel Chair comes with high back seats in recycled plastic, combined with a base in recycled aluminum in black powder coated finish. The seat is made of reclaimed polypropylene mixed with wood fiber. The wood particles create a speckled texture that gives the surface a warmer, more natural touch. The aluminum frame meets the demands of high traffic areas and offers easy maintenance. Made in USA. Choose from all-around glides for most surfaces or the felt glides for hard floors.

Shown in black powder coated aluminum / white
