Kepler Chandelier

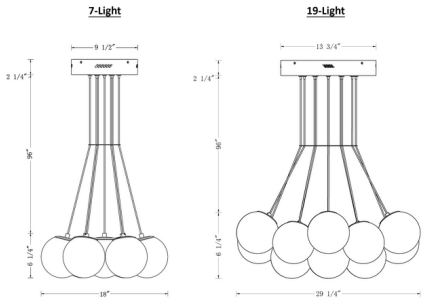

By Eurofase

Description

The Kepler Chandelier is a beautiful cluster of alabaster globes, where each is a single piece of alabaster stone that has been hollowed out and crafted into a smooth sphere. Natural veining of the stone varies from piece to piece, making each a unique creation. The chandelier takes on a celestial quality as integrated LEDs illuminate the globes from within, casting a warm glow throughout your space. Note: The 19-light chandelier requires a junction box rated for fixtures weighing over 50 pounds.

Shown in gold / white alabaster
