Eclipse Ellipse Wall Light

By Ingo Maurer

Description

The Eclipse Ellipse Wall Light utilizes simple components to create a dramatic interplay of light and shadow. The small disc houses an integrated LED which shines onto the larger disc to create pleasant indirect light and a ellipse shaped shadow. Designer Ingo Maurer intended for the fixture to stimulate the users' imagination, which he implemented by allowing the angle of the large disc and the position of the small disc to be adjusted. This functionality allows the size and position of the shadow to be adjusted to suit the individual user's tastes.
