My New Flame Portable Lamp

By Ingo Maurer

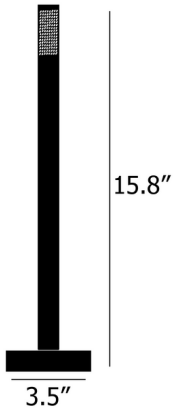

CE

Description

The My New Flame Portable Lamp offers the ambiance of candlelight with a bold, modern aesthetic. The body of the lamp features an exposed circuit board with LED arrays on both sides of the panel. The LEDs blink and flicker to create the image of a dancing candle flame and provide light. My New Flame requires 4 rechargeable AA batteries (not included), and it can also be powered by the included USB A to USB mini cord from a computer outlet or wall plug. While the charging cord is plugged in, the lamp can recharge the AA batteries, even while the lamp is in use. Built-in dimmer control located on circuit board. On/off switch located on base.
