Signature Pendant

By Ingo Maurer

CE

Description

The Signature Pendant is composed of a cable connected to a springy, circular structure to create the illusion of a random and continuous three-dimensional shape. The shade is intentionally inconspicuous to allow the tangle of cables to be the visual focus. Its conical form is accented by a rectangular fin, which causes it to appear to change shape as the pendant is viewed from different angles. The cable of one pendant can also be fed into the shade of another to link multiple fixtures into a sinuous cloud-like structure for large installations.
