Kite Highback Lounge Chair

By Stellar Works

Description

The Kite Highback Lounge Chair was designed with common areas and public spaces in mind. However, while many compact chairs designed for such use feature low and compact backs, the Kite Highback Chair puts its back on full display while maintaining a small footprint on the floor. Kite encourages the user to lean against the back rather than merely sit for a relaxing and comfortable feel. The cylindrical back wraps around the sides of the chair to provide a place for solitude if desired.
