Smart Control 300W 15V Transformer
By Kichler

Description

The Smart Control Transformer is compatible with Kichler and other low voltage landscape lighting, and offers the flexibility to design and schedule up to three independently controlled lighting zones. For even more flexibility, multiple transformers can be connected to create more zoning options. Using the Kichler Connects app, this transformer can be controlled with a smartphone, other smart device, or smart home systems Amazon Alexa and Google Home for ultimate convenience. Functions include power monitoring, fault detection, a manual mode setting for easy contractor set-up, dusk to dawn astronomical timer setting, and custom schedule creation. Angled terminal blocks for easier wire connects and heavy-duty, stainless steel construction make this transformer well-suited for outdoor environments.
